

ABHISHEK DUKARE

AI Engineer | Agentic AI · LLM Applications · RAG | Python · LangGraph · AWS Bedrock

+91 7020162627 | abhishekdukare689@gmail.com | Open to Bengaluru · Pune · Hyderabad · Remote | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

AI Engineer with 2.5 years of experience building GenAI products end to end. At Relevance Lab, built IngestIQ — a 13-node LangGraph agent on Amazon Bedrock AgentCore that turns a 4–5 person, 6-day data-mapping effort into a single day. Strong across agents, RAG, tool calling, MCP and LLM evaluation, plus the FastAPI / Next.js engineering to take a PoC to production and demo it to clients.

SKILLS

Agentic AI & LLMs: LangGraph (HITL interrupts, checkpointing), LangChain, multi-agent systems, tool calling, RAG, embeddings, MCP, prompt engineering, LangSmith, LLM-as-judge evaluation

LLM Platforms: Amazon Bedrock (Converse, Nova), Bedrock AgentCore, OpenAI, Claude, Gemini, Azure AI Foundry, Copilot Studio

Engineering: Python (FastAPI, Pydantic, pytest), TypeScript, Node.js, React, Next.js, Tailwind, SSE streaming, Playwright, Rust (basic)

Data & Cloud: PostgreSQL, Aurora Serverless, Supabase, MongoDB, Pinecone; Pandas, Polars; AWS (S3, Secrets Manager, CloudWatch, Budgets), Docker, Jenkins CI/CD

EXPERIENCE

Relevance Lab

Feb 2026 – Present

Software Engineer — GenAI | Bengaluru

IngestIQ — LLM-powered data transformation platform

- Built an agentic platform that maps incoming Excel/data files to target templates at sheet, table and column level, cleans the data and routes it through human review with a full audit trail — **4–5 people's 6-day workload now done in one day**.
- Designed a **13-node LangGraph agent** with human-in-the-loop approvals (FastAPI, Next.js, PostgreSQL, MinIO, Docker, Jenkins); migrated it to **Amazon Bedrock, AgentCore, Aurora Serverless and S3**.
- Load-tested a **205 MB workbook (10 sheets, 200 columns, 20K rows)** end to end; fixed stale-response and intermittent 500 errors; moved secrets to AWS Secrets Manager.
- Cut AWS spend by **~40%** using Budgets alerts, Cost Explorer analysis and scheduled Aurora shutdowns; now leading production readiness.

Kaman.ai 3.2 — multi-tenant AI agent platform (Rust + TypeScript, ~150 crates, ~30 MCP connectors)

- Built Tauri desktop chat features (screenshot attachments, streaming replies) with Playwright E2E tests; authored the team's AI coding-assistant workflow guide (5 task flows with quality gates and CI checks).
- Built client demos, including the LeaveIQ AI leave-management agent and DSL agent definitions for a client engagement.

Client PoCs

- Insurance Assistant** — text-to-SQL + RAG (Pinecone) agent with cross-turn memory (Next.js, FastAPI, Gemini). **Project Intake Agent** — document-extraction agent compared across Copilot Studio, Azure AI Foundry and OpenRouter, integrated into the client's Microsoft Teams with human approval. **Returns Automation** — AWS QuickSuite Flows workflow that reads return notes and product images to decide refund, replacement or rejection.

Carmatec IT Solutions Pvt. Ltd.

Sep 2025 – Feb 2026

Software Engineer (AI Engineer | Full Stack Developer) | Bengaluru (Remote)

- Integrated LLM-based content moderation and intelligent search into **Pipaan**, a social media platform (admin panel and user app).
- Built API integrations and AI-driven product recommendations for **Babiken**, an e-commerce platform; optimised frontend-backend integration for performance and reliability.

QuickTouch Technologies Ltd. (NSE Emerge: QUICKTOUCH-SM)

May 2024 – Aug 2025

Software Engineer (Frontend Developer | AI Engineer) | New Delhi

- QuickCampus** (cloud school ERP, used by **200–250 schools**): built Result & Template Management with AI-assisted report formatting and validation, reducing manual errors.
- Built a partner onboarding platform with AI-assisted form validation and insights to improve conversion; developed reusable, responsive React UI components.

Masai School — Assessment Assistant (Part-time)

Oct 2023 – Mar 2024

- Conducted technical interviews for students, evaluating coding proficiency and problem-solving skills.

PROJECTS

Project PA ([npm](#) · [GitHub](#)) — CLI that generates AI-narrated guided presentations for web projects; **2,000+ downloads at launch**. Also: [human-readable-errors](#) (npm), [ToolStack](#), [RoomLoop](#).

EDUCATION

MBA - Information Technology, Uttaranchal University (Online)

Expected 2027

BBA (Computer Applications), K.J. Somaiya College, Savitribai Phule Pune University — CGPA 7.55

2023

Certifications: AI/ML Engineering (Apna College, 2025) · Full Stack Web Development (Masai School, 2023)
